A RADIOGRAM FROM CHINA

In response to a letter urging ceramic graduates to take a more active interest in the American Ceramic Society, the department received the following radiogram:

Peiping, China, Dec. 6, 1930.

PROFESSOR WATTS,
OHIO STATE UNIVERSITY,
COLUMBUS, OHIO

Inspired by your letter trying to unite returned ceramists in promoting ceramic materials research solicit your guidance.

C. C. LIN.

This is the same Lin who was the moving spirit a few years ago in presenting to the Ceramic Engineering Department of Ohio State University the splendid painting on porcelain of General Edward Orton.

Ohio State University now has nine ceramic engineering graduates who came from China and have returned there to promote modern methods in ceramic manufacture. They are fortunate in having Lin as a leader, and we shall learn much of interest and value regarding Chinese ceramic materials and products from this group.
